How to change screen background color in Pygame?

Last Updated : 23 Dec, 2022

Pygame is a Python library designed to develop video games. Pygame adds functionality on top of the excellent SDL library. This allows you to create fully featured games and multimedia programs in the python language.

Functions Used:

- **pygame.init():** This function is used to initialize all the pygame modules.
- **pygame.display.set_mode():** This function is used to initialize a screen for display.
- **fill():** This method is used to fill the display with the color specified.

Example 1: This example sets the screen background color to red.

Python3

```
# Importing the library
import pygame

# Initializing Pygame
pygame.init()

# Initializing surface
surface = pygame.display.set_mode((400, 300))

# Initializing RGB Color
color = (255, 0, 0)

# Changing surface color
surface.fill(color)
pygame.display.flip()
```

Output:

Example 2: This example uses RGB color to set the screen color to blue.

Python3

```
# Importing the library
import pygame

# Initializing Pygame modules
pygame.init()

# Initializing surface
surface = pygame.display.set_mode((400, 300))

# Initializing RGB Color
color = (0, 0, 255)

# Changing surface color
surface.fill(color)
pygame.display.flip()
```

Output:

Looking to dive into the world of programming or sharpen your Python skills? Our [Master Python: Complete Beginner to Advanced Course](#) is your ultimate guide to becoming proficient in Python. This course covers everything you need to build a solid foundation from fundamental programming concepts to advanced techniques. With **hands-on projects**, real-world examples, and expert guidance, you'll gain the confidence to tackle complex **coding challenges**. Whether you're starting from scratch or aiming to enhance your skills, this course is the perfect fit. Enroll now and master Python, the language of the future!
